Increase your team's productivity by letting others edit CAD drawings using their own screens. The software allows you to show them all edits at once (video: 8:07 min.) Quickly generate icons and symbols to represent your CAD models. Draw shapes and import them into drawings. Just drag the graphic you want to use to a toolbar button or a new tool ribbon. (video: 1:50 min.) Get your team on the same page with flexible CAD flow. With built-in tools, like Snap to Grid, you can quickly get your team up to speed on CAD basics. (video: 2:16 min.) Draw faster. Record your commands and generate commands from your clips. Support for Universal Design: Universal design is making it easier for all users to access and use CAD software. Today, there are several tools that help bridge the gap between designers, engineers, and CAD users, including: AutoCAD 3D is a 3D CAD application with comprehensive 2D tools for drawing 2D and 3D objects that includes commands for flexible drafting and layout. It has dynamic layers and dynamic filters, and lets you change views and use different 2D and 3D tools at the same time. Workbench is a customizable tool palette that lets you pick and choose the CAD tools you use most often. With the tools you use most often at the tips of your fingers, you can work fast and with the precision you need for any type of CAD project. EasyView makes it easier to open, work with, and share files with people who don't have CAD software. (video: 1:50 min.) Create meaningful labels and properties. Easily add explanatory text to a drawing, model, or annotation. Use labels to identify the objects in a drawing, or assign properties to labels for their intended use. Use built-in parametric functions. The Parametric functions in AutoCAD® will let you automatically update a drawing based on values stored in a table, graph, or other spreadsheet. (video: 3:15 min.) Automatically generate 3D wireframes. Draw quickly on your 2D drawing, and AutoCAD will automatically generate a 3D wireframe model. (video: 3:25 min.) Get better feedback during your design process. Not only will the Reflection function in AutoCAD show you a mirror of the current drawing
