
Proteus VFX Redshift In Production

Redshift in Production is a new Proteus VFX release. This demo shows some of the effects we're producing with Redshift. Redshift's online Proteus Plug-in is perfectly suited for creating cinematic visual effects. It includes over 100 presets for materials, camera effects, particles and other features. Each preset fits one of a number of basic scenes, such as car chase, arrival in a jet, police chase and many more. Each individual effect can be easily modified to suit specific requirements, resulting in customized cinematics with just a few mouse clicks. Redshift comes with a collection of free particle presets. It can also be used together with other Proteus plugins, such as the famous Pixel and Daisy Particle Systems, for instance to create even more detailed effects.
