Pages May 27, 2015 Gertrude Kassebaum, Austrian Maskerade King Austria has had a bizarre fascination with masking and masquerades. Their passion for masked balls and events sometimes gives the impression that it is a national character: in December, 1931, the Times Magazine reported that masked balls were a "national habit" of Austria and the "mask is the foundation of an Austrian court costume", an idea that shows that the custom goes back at least to the early 1700s. I wanted to include Austrian masking in this post because another Austrian monarch was crowned King of Bohemia, of Moravia, and of Silesia (but not of Poland) in October 1861. His name was Franz Joseph and he was the uncle of the archduke who was married to Gertrude. The archduchess was the daughter of the emperor Francis Joseph and Gertrude was his niece, so the story is one of Austrian kinship. It is interesting that the archduke became the emperor Franz Josef and that his nephew Gertrude married a man who had the same family name as his, Joseph. One of the most enduring features of the Austrian Ball, or Masked Ball, is the "King of the Mask", who presides over the sequence of guest masquerades and awards prizes to the best-dressed. I want to present some of these "Kings" here, starting with the story of a daring young nobleman who not only dressed as a clown but actually portrayed one. The Mask King's first appearance was in 1849 in the ballroom of the Hofburg, the imperial court in Vienna. It was held by the emperor Ferdinand, who was a lover of dancing. That year's masquerades were held in the English style as part of his Coronation celebrations. For his first appearance as the Mask King, he chose the top hat, garb, and other elements of the traditional English style, but he also added something special. He had a costume of white fur with a top hat bearing the painted face and legs of a troubadour. It is striking when you consider that he had just three weeks to prepare. The next time that a young nobleman dressed as the Mask King was in 1860, when he actually introduced masquerading to the Austrian Ball. The 1860 Ball was a coronation ball for his brother Archduke Rudolf, who was to become

When you create a brush, the Brush Settings window (Figure 1) opens where you can adjust the effects and properties of the brush. You can create a new brush by selecting it from the Brush Strokes panel and then clicking the New Brush button in the Brush Settings window. The Brush Settings panel is similar to the Color/Grayscale/Grayscale 2 panels (Figure 2) in that it provides controls for adjusting the properties of the brush. In this tutorial, we'll cover the Brush Settings panel as well as the process for creating a new brush. Figure 1 The Brush Settings panel. Figure 2 The Color/Grayscale/Grayscale 2 panels. Step 1: Create a Brush To create a brush, select the Brush Strokes tab of the Brush Settings panel and click the New Brush button. A new brush window opens (Figure 3). In the Brush Name field, type a name for the brush. The Brush Name field is text-enabled and supports all the standard text-based features, such as bold and italic, but you can also upload an image or even a file from your computer. The Brush Size text field displays the dimensions of the brush as a percentage of the height or width of the image. For example, a brush size of 20% means that the brush is two-thirds the size of the image. The Refine Edge button opens the Fine Edge Detail panel to refine the shape of the brush using the settings shown in Figure 4. Figure 4 The Fine Edge Detail panel The Gradient Details panel (Figure 5) shows a gradient pattern that will be superimposed on your brush as it passes over an image. Figure 5 The Gradient Details panel The Blend Mode tab (Figure 6) allows you to adjust the blending properties of the brush. Figure 6 The Blend Mode tab This is the primary function of brushes—to apply a certain effect to an image—so you can really perform almost any kind of image manipulation using brushes. Figure 6 Step 2: Select a Source Brush The first step in selecting an appropriate source brush is to learn which ones are available and how they work. Brush selection refers to the method of applying an effect, such as a brush or a graphic style, to an image. For more information, see How to Select a Source Brush. Photoshop provides two different sets of brushes—Master Brushes and Custom Brushes. A Master Brush is a generic tool that
