Subsequent versions of AutoCAD introduced many new features, including advanced 2D and 3D functions. AutoCAD 2004 was the first version to require a paid subscription, in order to make use of some advanced features, such as object-level documentation and automated scheduling. AutoCAD 2008 and later are able to run on Windows platforms without AutoCAD Professional, but still require a paid subscription to get the features listed above. AutoCAD is one of the most popular desktop CAD applications in the world. In April 2018 Autodesk announced that Autodesk AutoCAD 2018 would be replaced by Autodesk BIM 360 2018.
