Docs2Manage Crack+ Keygen

If you are looking for a program that will help you get rid of duplicate files, you've come to the right place. Manage Duplicate Files is a small and user-friendly piece of software that will help you do exactly that. The program will display a list of all your files in the selected directory and help you quickly identify duplicate files. It will take care of removing them for you. It will even give you a chance to keep or remove the duplicate files in the new version of the files if you wish to. With this program, you can also search for other files that are similar to the ones you are currently removing. This will help you identify any kind of duplicate file, no matter how many files you have or how many folders you have in your system. The best part of this program is that it can easily detect duplicate files on multiple different drives, including FTP and FTP server folders, external hard drive, NAS, cloud, and SD cards. You can even set it to automatically run every time you log in to your computer. The program will scan your system for files every 10 to 15 minutes, and you can easily create simple rules that will help you find and remove files that are duplicates without having to manually search every folder. You can also allow the program to automatically open one of your most used files, which will make it much easier for you to identify the duplicate files. Manage Duplicate Files Key Features:

Docs2Manage Crack+

Docs2Manage is a user-friendly piece of software that provides users with the possibility to securely save their documents in a database that can be managed effortlessly from the tool's main window. Add documents with drag-and-drop With the help of this software, users can include any documents into the database with simple drag-and-drop gestures. The tool also makes it easy for users to search for any of their files and to manage them directly from its main window. The application includes support for creating new files as well, allowing users to select the type of documents they want to create and to edit them to add, remove, or modify content. It can be used to create Word docs and Excel spreadsheets but requires an external editor to open them. Save hard disk space The program has been packed with compression technology that allows it to save up to 90% disk space when storing documents. Any file included in the database requires far less storage space when compared to the original that is saved in any other location on the hard drive. Robust OCR capabilities Users can take advantage of the tool's OCR features when adding new files to the database. Thus, they can scan documents, use the OCR plug-in to extract the text from them, and then save them to the database in the form of txt or doc files. Add multiple notes to documents The software makes it easy for users to add and edit various details to their docs and to attach notes to them. It supports an unlimited number of annotations for each file and can even be used to attach comments to documents, on a separate layer. All in all, Docs2Manage is an intuitive, fast program for storing documents in a secure database. It allows users to quickly add and manage files and also features powerful compression capabilities, for saving disk space. Price: FreeVersion: 3.0.0 26.
