Is there a simple way of finding the size of a file that has been uploaded to the server? A: There is a well-known library for Java called Commons IO that will do this for you. It allows you to use the File class to file operations. This includes things like find the size of the file as well

as getting the InputStream associated with the file. The application of compound odontometric analysis for morphometrical analysis in odontogenesis. Long bones of the legs of rat embryos were studied with scanning electron microscope. The stage of intramembranous ossification of the sesamoid bones was chosen for the morphometrical analysis. The parameters of geometric shape, area, length and width of the medullary cavity, and area of intramembranous bone were measured and calculated. The results indicated a correlation between morphological and morphometrical parameters.
