the Adobe website.Q: Amazon S3 URL mime-types API I was using the "FileInfo" to retrieve the MimeType of a URL stored in a Amazon S3 bucket. Here is the code: var url = ""; var fileInfo = new FileInfo(url); Console.WriteLine(fileInfo.MimeType); However, when I used "fileInfo.MimeType" to construct a URL, the following exception occurred: Unable to cast object of type 'System.Security.Cryptography.X509Certificates.X509Certificate2' to type 'System.Security.Cryptography.X509Certificates.X509Certificate2'. It seems like the MimeType of the URL is not returned correctly by the Amazon S3 API. How can I retrieve the MimeType of a URL? A: I don't know why you are unable to cast that object to X509Certificate2 but a possible workaround would be to use HttpWebRequest and HttpWebResponse classes and make your own http request. In case of success, you can get the MimeType of the file, otherwise you can throw an exception. Make sure you also have access to the headers in your Amazon S3 bucket. or during the strike when it took place. "We are now in the final phase of our investigation", she said. The NGO went on to call on the UN human rights office to "urgently investigate allegations of violations and violence against trade unionists, journalists, and human rights defenders". In addition to Amnesty, the CNTC released a statement on Friday condemning the authorities' "disproportionate use of lethal force and excessive use of firearms". The statement insisted that the police "were not sufficiently dispersed or warned of the marches" d0c515b9f4
