I would like to be able to: click on an icon to show new tabs, click on a tab to change it to dark mode (how to achieve this?) I don't understand: why does clicking on the icon shows all tabs and how does getRenderedTab() returns true and false? how do I add a listener? I don't understand how to add onClick attribute Here's my code: var TabContent = React.createClass({ getInitialState: function() { return { isDark: false, icon: 'home' }; }, changeDarkMode: function() { this.setState({ isDark: !this.state.isDark });
