Santa is feeling particularly flaccid these days and is in need of a bit of holiday cheer. Get ready for an action packed, funny, Santa-centric adventure as he engages in kamikaze, snowball, snowball, throwing snowball fights, rocket war, and other childish forms of warfare. The instant classic game is the result of pure fun that will have your family and friends laughing for days! You are now playing the official Step in the Right Direction Launcher. The Step in the Right Direction Launcher is the original and perfect way to set up your Step in the Right Direction page. If you want to customize the launcher to work with the best of the new Step in the Right Direction plugins, then this tool is for you. Requirements: Step in the Right Direction Launcher is supported on all the new latest Step in the Right Direction Plugins including the LP and MP, Community Sites, Goal Scoring, and more! Step in the Right Direction Launcher is fully compatible with all the new plugins and works with the folder based plugins like Project:Corsi. It can also be used as a stand alone. To install the Step in the Right Direction Launcher, follow the instructions below: 1. Download and extract the zip file to a location on your computer. 2. Navigate to the "step-in-right-direction" directory you just extracted in Step 1 and open the "step-in-the-right-direction.exe" file. If you have entered the directory of the Step in the Right Direction directory correctly, you should see the launcher on your computer's desktop. 3. Click on the icon in your taskbar to

start the launcher. For further instructions, please follow this link: If you are having issues getting the launcher to work properly, follow the instructions below:
1. Ensure you are using an up to date browser. I recommend Google Chrome as a browser. 2. Ensure you are downloading the Step in the Right Direction.exe file rather than using the file link in the launcher. 3. Click on the icon in your taskbar to start the launcher. For further instructions, please follow this link: If you have problems setting up the launcher, or getting it to work, let us know and we'll provide help

Since it's one of the first multiplayer games (released 1997), the gameplay already saw several evolution since. Like it's even not a unique game anymore, you don't need to search yourself to find something similar. It is a kind of game that many of you probably played at least once, so it is definitely a legit and fun game (experienced players even call this game the best 2D multiplayer arcade game ever). Moreover, it's still one of the most played multiplayer game! AxeRage is not only known for its great gameplay and it is also thanks to his high quality gameplay and visuals (website). However, I wanted to

add a few things to it, especially for players like me.

What is AxeRage?
