WHITE MIST is a Fantasy Action RPG developed by Falcom Co., Ltd. and published by its subsidiary, NIS AMERICA INC. and NIS America Inc. Set in the fictional White Mist, an immortal world where the sun never sets, the story centers around the protagonist Arland. He is a sword-wielding rogue, a highly skilled summoner, and the personification of selfishness as you play through the game. There is a new and exciting action RPG awaiting you in the Lands Between, where the story of Arland and his friends unfolds. Play as Arland or one of his friends, and see the story of your choices come to life as you build your army to join the battle of the Gods at Mount Moberia. SYSTEM INTRODUCTION. This is an online RPG where players form a party and fight together in the battle of the Gods. In order to fight together, players need to be connected to a PS Vita or home console to play the game and must pay the same monthly subscription fee, which covers all of the ongoing fees. You can play White Mist with anyone located in your home country, and your past actions are used to determine whether or not you are allowed to play with others located abroad. This is the PS Vita version. If you play online, you will be playing in local play. Local play provides a more convenient connection for players located in the same country and ensures smoother online play. Local play can be accessed in the offline mode by connecting to a PS Vita or home console connected to your home network. In order to connect to your home network, you must have a home network adapter, which is included with the PS Vita and sold separately. In local play, you will be playing against players located in the same country as you, rather than the others located in different countries who participate in global play. In the global play version, you can play with other players located abroad. There are two places where you can choose to play: 1) In addition to the server located in the country of residence, you can access this server via the game's web service. The number of users who are allowed to play together is determined by the free data plan set by the service provider. For more information, please check in advance with the service provider for server maintenance schedules. \*2) If you do not have the ability to play online
