### What's New in the?

SureThing CD Labeler Deluxe is an application designed to help you create a professional label for a record, CD, or DVD with ease. In addition to the included templates and tools, you can also import music from a CD or MP3 files from your hard-drive and export them to a format compatible with your CD, such as WAV or MP3. Built-in Shapes and Editing Tools The main layout of a CD label can be edited and customized at will, and the included templates give you plenty of design ideas to work with. The shapes included in the package can be used to easily create text boxes, as well as circles, rectangles, and more. Similarly, the editing tools include the red-eye removal tool, the object selection tool, the text positioner tool, the word-addition tool, the text shaper tool, the intensity adjustment tool, the shadow effect tool, the color overlay tool, the text-bubble tool, the border editing tool, the gradient effect tool, and the red-eye removal tool. Add Borders In addition to the standard text and shapes, the included templates give you the ability to add borders of your choice to create attractive text and design on your label. These borders can be located vertically or horizontally. Text and Layer Content The text included in the toolkit can be easily edited and modified; you can select text, edit its properties, or even change its color. The text can be positioned on a layer that can be positioned on a template in just a few clicks. The application also includes a basic text system with more than 120 fonts and a collection of symbols for special objects like pictures, CD covers, and icons, among others. Add Music You can add music to your CD from a variety of sources, including CDs, MP3s, and your hard-drive. The music files can be imported as MP3 or WAV files or can even be put on a track using the Audio/Midi Track Editor, allowing you to use these files as a playlist. Import From... Import from CD Automatically import the songs from a CD or DVD into a playlist. Import from WAV Files Automatically import MP3 files from a CD or from your hard-drive using the audio file importer. Exports Export your playlist to WAV and MP3 audio formats. Customizable Toolbars Customize each button in the toolbars to suit your requirements and create a unique interface
