Rewrite rule for query string + sign I'm  
trying to rewrite a URL that looks something

---

like this: What I would like is for the above URL to be rewritten so that I get something like: and d disappear. I have a basic knowledge of .htaccess and rules, and have tried something like this: RewriteEngine on RewriteRule ^b/([^/]+)/?\$ /a/\$1/ [R=301,L] but that didn't work. Can anyone help? A: The URL-path that you are adding is not consistent with your problem description. Rewriting the URL-path should not affect the query string. What you are trying to do is probably no longer supported by the default Apache configuration. It seems that you are trying to put some kind of function in the query string that allows the user to modify his server behavior, such as login credentials. This is a bad idea. Users will be able to get what they want, namely the same website with different content depending on their location or conditions, but you will have no control over it. Early neoplasia of the external auditory canal. The clinical presentation of this problem

---

differs from that of many other tumors of the auricle. There is often some form of concomitant parotiditis, resulting from rupture of one or more parotid ducts. The common denominator is a lesion which is only accessible by a surgical incision through the skin, rather than through a
